

Local Area Coordination in the City Health Cluster

“ Our vision: ‘All people live in welcoming communities that provide friendship, mutual support, equity and opportunities for everyone’. ”

Local Area Coordinators can be introduced to someone for many reasons. **They will walk alongside people**, while they identify their skills and their **good life**. They can help people **build relationships**, find out about, and access the **community**, be more **active**, or overcome issues with **isolation, loneliness, bereavement** and mental **health problems**, amongst many other things.
